Flow Brights – Midnight
Re Entry - Why throw away what's valuable?

Every day, tonnes of carpet is discarded, with most of it ending up in landfill in New Zealand. And much of it nowhere near the end of its working life. The resources and embodied carbon involved in the manufacture of quality flooring is a prized resource. With ReEntry, we can create more value from used flooring.

We put them to good use, more importantly, we make sure they don’t go into landfill.

By partnering with Interface and utilising their ReEntry closed loop recycling service, it’s easy to make a contribution and improve your sustainability performance.
